"__'Bow Aides See Consensus

ffered by Unesco Chief

tries, the officials said. Unesco has been trying to produce an agreement on the mass media for eight years. Previous at-tempts failed because of East-West ideological differences over freedom of expression.

> The argument between advocates of press freedom and Communist and other countries which support government controls has produced marathon debate. The media issue has been the most controversial of the Unesco general conference.

Western, Communist, and nonaligned countries all tabled rival texts. Unesco officials said that they expected these drafts to be withdrawn in favor of the Senegalese director's compromise document. If all went well, Unesco's commission on culture and communication would be able to approve the mass media document by consensus in a floor debate on

Wednesday.

Mr. M Bow said at the start of the conference that he was aiming for a consensus vote on the mass media so that the resulting declaration could command the strongest possible moral authority.

Delegations involved in back-

stage negotiations on the media declaration were not yet ready to give an assessment of the directorgeneral's chances of winning unanimous support for his text.

them showed no signs of violence.

"They were smiling ... they looked genuinely happy," Mr. Lane It was not clear whether the mass deaths occurred at about the same time or some time after the Saturday ambush of Rep. Ryan, D-Calif., and his group, which had gone to the camp to investigate re-

ports of alleged large-scale abuse of

The information minister said no one was found alive in the jungle settlement where about 1,100 son, 27, right, are shown in film taken Saturday by NBC-TV cameraman Robert Brown at Port Americans had been reported livmg. Most of them were Californi-

ans who followed Mr. Jones, founder of the People's Temple, to Guyana. There was no indication of what happened to other members of the community.

She added that a few members of

the community who had taken re-fuge in the forest were beginning to come out and had been found by security forces. An estimated sever-al hundred members of the temple

were still missing.

A California psychologist who had accompanied Rep. Ryan to Guyana to try to get his daughter out of Jonestown said members of the group rehearsed mass suicide and signed suicide notes before they left California.

Five persons who survived the ambush of Rep. Ryan and his party were reported in stable or satisfac-tory condition today by doctors at Andrews Air Force Base hospital. The five arrived at the facility out-side Washington last night. Although they were suffering from gunshot wounds and shock, a State Department spokesman said they were in "great spirits."

Rep. Ryan and the four others perished in a hail of gunfire Satur-day evening as his party was escorting persons seeking to leave the settlement aboard two planes at a nearby airstrip in northwestern

The group, consisting of U.S. officials, reporters covering the expedition, escaping members of the sect and their relatives, was attacked by men from the settlement, firiog pistols and automatic weapons from a tractor-drawn flatbed

When the shooting stopped, some of the terrified escapees from the settlement had fled into the sur-

rounding jungle,
In addition to Rep. Ryan, those killed were Donald Harris, an NBC television reporter from San Francisco; Robert Brown, an NBC cameraman; Gregory Robinson, a photographer for the San Francisco Examiner, and Patricia Park, ooe of the community members.

Mr. Lane, who has figured in cootroversies about the assassinations of President John F. Kennedy and the Rev. Martin Luther King and another U.S. lawver Charles Garry, who has represented Black Panthers and other radicals - had remained behind at the settlement

The wounded and the others who remained spent a night of fear and uncertainty at the airstrip and a nearby town until their rescue yesterday by Guyanese troops.

Target of Charges

Mr. Jones' church had been the target of frequent charges from former members and relatives of adherents that it subjected followers to intimidation and violent punishment for failing to observe its rules or for attempting to leave.

It was the persistence of these charges that led Rep. Ryan, 53, a San Francisco-area congressman, to undertake an 18-month investigation of the church. He decided to go to Jonestown for a look at the situation after becoming dissatisfied with State Department attempts to investigate complaints from his constituents about alleged, abuses of U.S. citizens at the colony, aides to Rep. Ryan said yes-

Turkey Stops 200 Leftists After Hijacking of Ferry

ISTANBUL, Nov. 20 (Reuters)

— About 200 leftist militants seized a Bosphorus passenger ferry today and held it for about an bour until it was challenged by Turkish naval vessels and escorted to the city's maio boat station.

Police initially reported that the militants intended to hold a protest demonstration against the presence of two Soviet warships visiting Islanbul. But a later police statement said the group intended to take part in a tuneral ceremony for a leader of the underground Turk-ish People's Liberacon Army, whose body was found in mysterious curcumstances last week. Police sources said they feared that the funeral might develop into another battle between police and youths.

Police said that 200 persons were taken into custody from the ferry when it arrived in the city.

Earthquake Jolts Turkey ISTANBUL, Nov. 20 (AP) - A moderate quake jolted Antakya, on the Mediterranean coast of Turkey, during the night hut caused no injuries or damage, the Anatolia news

agency reported today.

other group of leftists clashed with the security forces outside the morgue when Metin Yildirimturk's body and that of another leftist student were being handed over to rel-atives for hurial. Yildirimturk was serving a 15-year sentence for terrorist activities when he was released under a general amnesty in 1974. Since then had had gone to

Arab States Plan to Build Their Own Modern Arms

By Drew Middleron

NEW YORK, Nov. 20 (NYT) -A group of moderate Arab states an indigenous Arab arms industry plans to establish an advanced was taken in September when the plans to establish an advanced arms industry in Egypt, in a move that may promote their greater independence from arms purchases in the Soviet Union and the United

Reviewing the scope of the plans for the Arab Organization for Industrialization, some U.S. and West European sources believe that the output of advanced arms will not only supply the moderate Arah states but may lure Soviet arms clients, such as Syria and Iraq, away from their present dependence on

Soviet weaponry.
Highly placed Arah diplomats in Washington said that they saw no relation between the planned Arab arms concern and the signing of a peace treaty between Israel and Egypt. The organization, they insist, is to be the hackbone of a new pan-Arab arms industry that will serve all Arab states.

Indigenous Industry

Senior Israeli officers said they dangers to their country arising from an Arab arms industry. These officers conceded, however, that this industry could pose a threat in the future.

Boos, Cheers Greet Gandhi In Parliament

NEW DELHI, Nov. 20 (UPI) -- Indira Gandhi, former Indian prime minister, re-entered Parliament today after a lapse of 20 months amid jeering and acclama-tion from the 400 bouse members

As she entered the chamber. escorted by C.M. Stephen, leader of her opposition Indira Congress Party, Jyotirmoy Basu, a Communist Marxist leader, shouted, "The evil has come." At the same time, about 70 mem-

hers of Mrs. Gandhi's party thumped their desks and shouled at Mr. Basu, "Shame on you." A ruling Janata Party member said, "The fountain, the source of

corruption is here."
Unperturbed, Mrs. Gandhi took a seat hy the side of Mr. Stephen. She was elected to Parliament 13 days ago in a hy-election in Chik-

issue of "linkage" in the form of a generally worded preamble to an Egyptian-Israeli peace treaty. But the Cabinet was not satisfied with that solution to the gulf between Egypt and Israel over Egypt's linkage of the West Bank and Gaza and the introduction of an Egyptian police in Caza which Egypt and introduction of an Egyptian police. able to Israel. These demands included a specific timetable for Israel to implement the civil autonomy plan for the 1.1 million Arabs of the West Bank and Gaza and the introduction of an Egyptian police presence in Gaza, which Egypt administered until Israel captured the strip during the 1967 war. Mr. Begin last night said at a

World Growing at Slower Rate

WASHINGTON, Nov. 20 (WP)

— For the first time, the rate of increase in the world population has slowed, the U.S. Census Bureau re-

ported yesterday.
Since 1970 the world's population has increased 1.9 percent
annually, while in the previous 15 years it had risen 2 percent each year, according to the bureau's study, which was funded by the Agency for International Develop-"We didn't expect a downturn in the rate of increase until the early

1980s, hut it's happening a decade earlier and it's very significant," said Samuel Baum, the bureau's chief of international demographic The difference of a tenth of a

percentage point "is not a tremen-dous decline, but it's important, because the numbers are so high and it represents a change in direction, which is more important," Mr. Baum added.

Africa Growth Persists

"The encouraging thing is that the direction has shifted in all regions of the world except Africa, and even there a number of countries — Tunisia, South Africa, Mauritius and Reunion — have had substantial declines," he said. (The latter two are islands in the Indian Ocean.) Mr. Baum noted that more people are being added to the world and predicted that a growth rate of zero "will not be reached, at the earliest, until the years 2020 to 2025."

The world's population increased from 3.5 hillion in mid-1967 to an estimated 4.3 billion in mid-1977, the report said. "At current [1976] vital rate, the world registers a net gain of over 200,000 persons each

day," it said.

Mr. Baum said that two trends account for the reduced rate of growth: a paid decline in fertility and a not-so-rapid decline in mortality. "People are being born at a slower rate and deaths are not going down as rapidly," he explained.

The census report does not report do

project future world population, hut the World Bank has predicted that it will reach 6 hillion by 2000; the United Nations has predicted

6.3 billion hy that year.

A study released last month hy
University of Chicago demographers Amy Ong Tsui and Donald
Bogue projected a 5.8 billion total
and said that the world's projected
population crises may have been defused by birth-control programs in some of the most populous coun-

"Only 10 years ago doomsday prophesizing called for mass starvation, world chaos and possible world war by the year 2000," their study said. "If recent trends continue, the world population crisis appears resolvable." The census recent treats that are port seems to support that opti-

The census report noted growthrate declines in less-developed as well as developed nations. It cited Sri Lanka, where the 1966 growth rate was 2.3 percent and the 1976 pines. Thailand and South Korea each had a decline of 0.7 percent; Colombia had a decline of 0.6; South Africa, 0.4, and Turkey and

China Estimates The estimate for China was based primarily on provincial population figures that have been re-leased since the Sept. 8, 1976, death of Chairman Mao. China's population was estimated at 982.5 million, 23 percent of the world figure.

Asia, with 2.5 hillion persons, had 58 percent of the world's total last year, the report said. Its popn-

Refugees Likely To Disembark Soon From Ship

PORT KLANG, Malaysia, Nov. 20 (AP) - Indications that 2,504 Vietnamese refugees soon will be taken off the overcrowded coastal freighter Hai Hong increased today with the arrival of officials to arrange for some of them to go to

Meanwhile, Malaysian officials announced that another 590 Viet-namese refugees landed in Malay-sia last night, pushing the number of arrivals since Nov. 1 to more than 7,000 and the total in the country to more than 40,000.

their fourth round of talks with Malaysians today to work out the mechanics of taking the Hai Hong refugees off the ship where they have spent about 37 days, including

MOSCOW, Nov. 20 (UPI) - The

thirds of the world's increase.

The United States had a growth rate of 0.5 percent between 1976 and 1977, compared with 1.1 percent between 1966 and 1967. The United States had 5 percent of the world's population last year. North America, Europe and the Soviet

Union, combined, had 23 perce the report showed.

Africa's annual growth rate 1 tween 1975 and 1977 was 2.8 p ent. It has been rising stead since 1950, when it was 2.1 perce India's growth rate was 2.2 perc in 1976 and 1977, about the sa as in the mid-1960s.

U.K. Court Told Thorpe **Urged Murder of Model**

cloud hanging over him." There was some discussion of sending Mr. Scott to the United States, but that was rejected because of the directity of getting a work permit for him.
At that point, Mr. Bessell testified, "Mr. Thorpe said, 'Then we
have to get rid of him,' I decided to
treat it lightly. I said, 'Are you suggesting killing him off?'

"When you said that," the prosecutor asked the witness, "what
did Mr. Thorpe do?"

did Mr. Thorpe do?"

"He stood up, lonked at me and said "Yes," "Mr. Bessell replied.

Mr. Bessell said that he then pointed out the practical difficulties of dispersing of a hody. Mr. ties of disposing of a body. Mr. Thorpe answered, according to Mr. Bessell, that it could be huried in the fresh concrete of a new expressway, weighted and dropped into a

river or dropped down a mine.

Mr. Bessell said that he protested that it was morally wrong to discuss murdering someone. Mr. Thorpe replied, he said, that killing Mr. Scott would be "no worse than

Mr. Scott would be 'no worse than shooting a sick dog."
Later, Mr. Bessell testified, he attended a meeting at which Mr. Thorpe was attempting to persuade Mr. Holmes, a friend since Oxford days who had been best man at his first wedding, to carry out the murder. The plan allegedly called for Mr. Holmes to pose as a German Mr. Holmes to pose as a German reporter, get Mr. Scott drunk, then drive onto the Cornish moors and

murder him.
The plan was later shelved, Mr.
Bessell said, because Mr. Scott was married. Mr. Thorpe hoped that he would stop telling people he had been his lover. At that point, Mr. Bessell's account was interrupted by the court's adjournment, but Mr. Taylor had sketched in the rest of the prosecution's case before calling Mr. Bessell to the stand.

With Mr. Thorpe's wife, Marion, and his stannchest defender among the Liberal members of Parliament, Clement Freud, listening intently, the prosecutor said that Mr. Thorpe had developed an obsessive anxiety about the "continuing danger" posed to his reputation and career by Mr. Scott.

By 1974, he said, Mr. Holmes,

Westinghouse Fined \$300,000 For Egypt Bribe

WASHINGTON, Nov. 20 (UPI) A federal judge today fined Westinghouse Electric Corp. a maximum of \$300,000 for overseas payoffs after the Justice Department identified the bribe recipient

as former Egyptian Deputy Pre-mier Ahmed Sultan Ismail. U.S. District Judge Barrington Parker had rejected a plea-bargaining agreement last month because the government refused to identify the country involved or the foreign official bribed. Today, he accepted a govern-

ment proposal that it withhold any prosecution of Westinghouse cmployees involved in funneling \$332,000 in hribes to the Egyptian minister in 1975 for awarding the firm a \$30 million contract for a

fourth power station it has con-structed in Egypt.

In filing an amended plea bar-gain which made the full disclosure. Justice Department attorney Jef-frey Hirschberg pointed out that The Washington Post had already named both Egypt and the deputy prime minister (IHT, Oct. 27) without revealing the source of its

Judge Parker levied the maximum fine of \$10,000 for each count in a criminal information, charging that Westinghouse made false statements to the Export-Import Bank and to the Agency for International Development, which had financed about 90 percent of the Westinghouse construction project and a second contract calling for additional services to Egypt.

Israel Requests Time For Nazi Prosecution JERUSALEM, Nov. 20 (UPI) --

The Israeli Parliament voted unanimously today to urge the West German Bundestag to reject a statute of limitations on the prosecution of

Nazi war criminals.
"If this is accepted, from the year 1980 on all the German Nazis who murdered and escaped punishment will raise their heads and go free." Justice Minister Shmuel Tamir said. "They will arise and say openly We did it and we are proud of it and are even nostalgic about it."

Jeremy Thorpe

who until then had resisted sur tions that Mr. Scott be murd-decided that Mr. Thorpe was r "A plot was hatched" among." Thorpe, Mr. Holmes, Mr. De, and Mr. Le Mesurier to fir, killer, Mr. Taylor charged.

1377. About SHINGTON, Nov. 20 (WP)

1360. J.S. Supreme Court Justice Schools Justice Marshall, a Howard law graduate, was at that time counsel for the Legal Defense and Stational

ocially for them.

Odo e careful of the people who You've got it made. Take it You don't need any more You don't need any more come a long way," he said. "But so have other people come a long

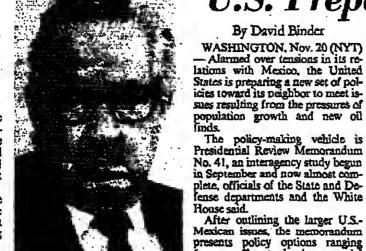

"Has the gap been getting smaller? No. It's getting bigger. People say we're better off today. Better off than what?"

Justice Marshall said he is urged to travel the country to give black children "inspiration."
"For what?" he asked. "These

Negro kids are not fools. They know that if someone says they have a chance to be the only Negro in the Supreme Court, the odds are against them."
When he travels, people tell him

of the same troubles they did 20 and 30 years ago when he first sounded the note that "things are going to get better," he said.
"Only guess what I'm getting now? You not only told me that but you told my father, too, and he's no better off. Are you going to tell my children that, too?" he

Justice Marshall warned that "they" — those against blacks — are in every phase of American life

Thurgood Marshall

and "are still laying traps for us." He pointed to reports of a resur-gence of the Kn Klux Klan and said, "The Klan never dies. They just stop wearing sheets because sheets cost too much."

He urged American blacks to train themselves to be better than the whites they go up against in law, politics or business. Quoting Charles Houston, the Howard law dean during the 1930s, Justice Mar-shall said, You've got to be better, boy. You've got to move better."
He said that American blacks need to use both the courts

and their political muscle to achieve equality. "Don't listen to that myth that it [inequality] can be solved by either or that it has already been solved," he said. Take it from me, it has

projected by Mexico at 300 billion barrels, making it potentially the WASHINGTON, Nov. 20 (NYT) largest oil producer. Alarmed over tensions in its re-

• Trade Mexico is already the fifth largest partner of the United States and the prospect is that the volume of \$9 billion will rise sharplations with Mexico, the United ly, but with attendant problems of population growth and new oil market disruptions and protectionist demands in the United States.

Among the policy alternatives, the study proposes a comprehen-sive U.S.-Mexican approach to the issues, in the form of either a package deal or a set of negotiations stretching over a number of years. According to officials, the memorandum recommends a preliminary accord that would outline the approach to be taken.

Frontier 'Zones'

Alternative proposals call for individual or joint approaches to each issue. For instance, on the question of border problems, there is a suggestion that Mexico and the United States might consider creating frontier zones on either side of the boundary to deal with smug-

Mr. Katz now must obtain a

tial as a separate issue.

One aide involved in the drafting of the study said he believed Mexico's announcement last week of new oil discoveries had been made deliberately to prod the United States into action. He said the announcement had come on top of frustration manifested in a declaration Oct. 13 by President Jose Lopez Portillo that "Mexico is neither

ing food

New Baby Adds To Visa Trouble

Of Soviet Family Ready to Leave

on the list of United States priorities nor on that of United States The study also acknowledges

that, after an auspicious start, with Mr. Lopez Portillo being one of Mr. Carter's first foreign guests, the United States has tended to neglect its relations with Mexico.

U.S. policy-makers remark that Mexico would probably be reluc-tant to enter into arrangements with the United States that would open it to economic dislocations or to being overcome by the mode of life of its northern neighbor. Yet they also recognize Mexico's desire

to develop its natural resources. The study, which had its origin in the State Department, is to be reviewed soon at a meeting chaired by Secretary of State Cyrus Vance. The participants are to include Zbigniew Brzezinski, the president's adviser on national security, his National Security Council aides and representatives of the White House Domestic Council.

Stephen Gardner, Fed Vice Chairman

WASHINGTON, Nov. 20 (NYT)

— Stephen Symmes Gardner, 56, vice chairman of the Federal Re-

vice chairman of the Federal Reserve Board, died of cancer at his home here yesterday.

Mr. Gardner, a former deputy secretary of the Treasury, was appointed to the Fed by President Gerald Ford for a full 14-year term that began in Fehruary, 1976. He succeeded William Simon, who became Treasury secretary.

As vice chairman, Mr. Gardner took a moderate stance on the

took a moderate stance on the board, usually voting with the majority in supporting the trend toward higher interest rates that the board has followed in the last two

His death came two days after the resignation of another member of the board, Philip C. Jackson Jr. It gives President Carter the opportunity to make a fourth appoint-ment to the seven-member board, meaning that Carter appointee will have a clear majority and greater influence in shaping credit and interest rate policy.

Mr. Gardner was born on Dec. 26, 1921, in Wakefield, Mass. He served as a director of several na-tional corporations and was active in Philadelphia civic affairs when he lived there. He was a trustee of the United Fund, a director of the YMCA Foundation and a member of the World Affairs Council. He joined the Girard Bank in Philadel-phia in 1949, becoming a vice presi-dent nine years later, president in 1966 and chairman in 1971.

Lennie Tristano

NEW YORK (AP) - Pianist and composer Lennie Tristano, 59, who once played with jazz greats Dizzy Gillespie and Charlie Parker, died of a heart attack at his home

here on Saturday.

Mr. Tristano began his career as a saxophone player in the late 1930s. Later he devoted more of his time to the piano and spent the last part of his life teaching new jazz

He was known for his creative jazz improvisations and methods, which he passed to his students, including jazz saxophonists Lee Kon-itz and Warne Marsh, and pianist Sal Masca.

Although Mr. Tristano was known as an innovator and is said have created new dimensions in the field of jazz, be lived a private life, shunning publicity. His better-known works include "Cross Currents," "Yesterdays," "Descent Into the Maelstrom," "That's Jazz," and "The New Tristano."

James E. Nottingham Jr. NEW YORK, Nov. 20 (NYT) -James Edward Nottingham Jr., 53, a Brooklyn-born trumpeter whose work ranged across the music scene from 52d Street jazz clubs of the late 1940s to more recent appearances with television network orchestras, died on Thursday at Brooklyn Veteran's Hospital.

A facile, stylistic player, Mr. Nottingham could play big, warm, fully shaped notes in the uppermost range of the horn. "He had the endurance, the range and the sound that could have led to a big-time virtuoso career in jazz," said Seldon Powell, a woodwind player long associated with him.

Although Mr. Nottingham re-garded himself foremost as a jazz. player, he chose to work in more

Peking Is Beijing But China Stays China in New Spelling

Paul Newman's Son Dies in U.S. Of Overdose of Alcohol, Drugs

HOLLYWOOD, Nov. 20 (UPI)

— Allan Scott Newman, 28-yearold son of actor Paul Newman, was found dead in a motel today, the victim of an overdose of drugs and alcohol, according to police.

Mr. Newman, an actor and entertainer who worked in nightclubs under the name of William Scott, was pronounced dead at Los Angeles New Hospital

Police said a Los Angeles clinic had received a call for help from Mr. Newman last night and that clinic associate Scott Steinberg took the stricken Mr. Newman to his room at a nearby motel.

According to authorities, Mr. Steinberg called paramedics who took Mr. Newman to a bospital about midnight.

Mr. Steinberg told police he thought that Mr. Newman had taken Valium, a tranquilizer, and a quantity of alcohol. He also said Mr. Newman had approached the

clinic in the past because "he wa ed to change his lifestyle." Mr. Newman's mother was Jack ie Witte, Paul Newman's first wif

Contamination Threat Said Reduced

Nuclear Waste Solidified At Unique French Plant

By Paul Lewis

ing ahead with a process that solidifies liquid nuclear wastes - a development that will make it easier for Europe to build a plutoniumhased nuclear industry, against President Carter's wishes.

Last summer the government-owned Compagnie Generale des Mau'eres Nucleaires, known as Cogema, successfully started the world's first industrial plant for solidifying the highly dangerous bo-ind nuclear wastes produced from the reprocessing of spent fuel from nuclear power reactors.

The plant, at the nuclear center at Marcoule in the lower Rhone valley, turns these wastes into hlocks of shiny, hlack, corrosion-resisting borosilicate glass, which can be huried deep in mountain caverus while their harmful properties gradually dissipate during the next 100,000 years or so.

The process of vitrification, as it is called, is attracting international attention. Cogema is negotiating to sell the technology to West Germa-ny, Britain and the Netherlands. A panel of Swedish atomic experts re-cently recommended adoption of the new process.

No Present Rivals

cial importance of his company's discovery. "We're not trying to make a fortune out of this. It's essentially a safety system," he said.
"If other countries are interested in a licensing arrangement, then we are ready to talk. But we're not pushing sales."

Whatever its commercial significance, the new process promises to make an important contribution to Western Europe's continuing drive to develop a plutonium-based nu-clear industry.

Carter Seeks Ban

It would help Europe safety dispose of the increasingly large quantities of dangerous liquid waste material that will burden it in hreeder power reactors. The French reprocessing plants.

PARIS, Nov. 20 (NYT) - of spent uranium reactor fuels tiens um, which is the principal explosi used in atomic weapons. He he also called for a ban on the furth development of fast-breeder reo tors, which use this platonium

But Western Europe, which hing less oil, coal and natural uraniu a of its own than the United Statuor has turned a deaf ear to the Pres dent's pleas. Officials in Westerch Europe argue that reprocessir ur prolongs the useful life of uraniuhos reactor fuels and that the still-esco perimental fast-breeder reactim could eventually provide virtual inexhaustible supplies of electric DOWEL.

The liquid wastes created l reprocessing are believed to remain dangerously radioactive for 400 to 1,000 years. Thereafter, scientifications studies suggest, they will continu to harbor quantities of highly toxy but nonradioactive plntonium for about 100,000 years.

In liquid form, such wastes ar difficult to handle. Even when think wastes are buried deep in the earth which is how governments not in which is how governments no plan to dispose of them, there re a mains the danger that they might leak out of their containers during the course of the centuries and constitution to the course of the centuries and constitution and constitution of the centuries and constitu

Twn wall posters calling for a full public investigation into the suppression and cover-up of a manual results of the suppression and cover-up of the su him to oust Mr. Teng after the Tienanmen affair. First Direct Tie

The poster was the first in the current campaign to downgrade Mao's reputation that directly ued him to the disgraced radicals, who include his widow, Chiang Ching. Left unsaid in the posters yesterday and today was what role Mr. Hua

played in the incident.

A dispatch yesterday by the Chinese press agency said that Mr. Hua had just written the title in his own calligraphy for a new book of poems celebrating the demonstra-tion. An editor of the book said it showed that "Chairman Hua is in-deed at one with the people in their hundreds of millions."
"Chairman Hua's inscription is

great importance," the editor

does in such cases. And he carefully avoided praising the Tienanmen incident as revolutionary, as the Peking Communist Party Committee did last week.

Indeed, the analysis felt, Mr. Hua's action seemed at most a compromise gesture to try to extract him from a very awkward situation. Moreover, there is a possihle hint that Mr. Hua's own personality cult. which has been gradually building, might now deflate.

The analysis believe that the flurry of political activity in the last week may presage a meeting of the Central Committee or an enlarged group of the party Polithuro.

In addition to the new posters, there were articles attacking the Cultural Revolution as a "counterrevolutionary fascist dictatorship and disclosing that the authors of several famous wall posters in the said to a group who reportedly Cultural Revo packed the publishing office to wit-ness its arrival. But analysts here volutionaries. Cultural Revolution had been arrested and punished as counterre-

party hierarchy between those vet-eran leaders allied with Mr. Teng who want to debunk the Maoist legacy in order to push for all-out economic growth, and those who benefitted from the Cultural Revolution and whose careers would suffer from a reappraisal of those

An indication of these differences was apparent last week when the Polithuro conspicuously failed to endorse the decision by the Peking party committee to declare the Tienanmen incident as being revolutionary. Until then the events of April, 1976, had been damned as

An article Saturday by the Chinese news agency disclosed that 388 persons had been arrested for

participating in the riot in Peking, many of them "children of senior cadres and people related to leading members in the party, government and army." The arrests have been blamed on

minister of public security. Peking itself was administered by Wu Teh. a Politburo member who was dropped from his municipal job earlier this fall. The analysts believe it is unlikely

that Mr. Hua will suffer a direct de-motion in any full-scale party meeting, given a strong desire in China for unity to pursue economic devel-opment. More likely, they specu-late, Mr. Teng will be able to get more of his own supporters voted onto the Politburo, providing a more realistic reflection of his growing authority than exists in the current party lineup.

adroit at shifting his political ground, and he may already have

In the past, Mr. Hua has proved

done so again with his inscription for the volume of poetry. Neverthe-less, the new infighting suggests that China is still unable to overcome the heritage of personal bit-terness of "settling of scores," which Mao provoked with the Cultural Revolution.

Costume Party Making A Comeback in Paris

PARIS, Nov. 20 (IHT) — The wildest styles on the runway are now quickly labeled disco. Under that eatchall designation, anything goes and the fad that which started about a year ago is far from receding

Both "Saturday Night Fever" and "Grease" have helped spread the crazy-as-crazy-can be style, including sexy, satin maillots, with or without sarong drapes. The main thing is to be estentatious, brilliant, sequined to the teeth and tacky — oot to say vulgar.

Actually, disocs have also brought back a taste for costume parties; the trend started last spring with Loulou de la Falaise's post-collection fete "for fairies and witches." Karl Lagerfeld followed this season with his Venetian fete, which had some of the most startling costumes seen in Paris in years (including Lagerfeld's friend, Anna Piaggi, carrying a hasket out of which hung a couple of dead hirds). Lancome followed with a "Black Magie" party to launch its

Not one to be left behind, Regine is also doing her thing. At New Jimmy's, she is bolding the first round of her international disco-dancing contest. The finale will be held in Paris in June.

Disco

A Russian Looks at Studio 54

MOSCOW (AP) — Seviet read-ers have been treated to a ment chite, They enter at 5 p.m. and glimpse of the New York disco scene - principally Studio 54 through the outraged eyes of a journalist who decounced the nightspots as havens of decadence and loneliness.

He depicted dancers snorting cocaine in the bathroom, teenagers obsessed with their mirror images. and "masochistie" crowds lining up to enter the pleasure palaces just to "spend a whole night shaking with the lights and dreaming of lame. success and money."

It was obvious from the account io the weekly oewspaper Literatur-naya Gazeta that Saturday night fever had not infected writer Genrikh Borovie of the official Soviet news agency Tass.

But for the youth of the United States, Borovic wrote, discos are mirvana for lonely people who don't want to have cootaet with anyone and who couldn't anyway. for people who want to be left alone to forget about everything." Furthermore, the journalist reported, elever operators were ex-

ploiting the audiovisual glitter, the allure of talentless movie stars and exclusive admissions policies to make a fortune off unsuspecting

'Founded on Loneliness'

"How many looely people are there in America? Very many!" Borovic wrote, "fo any case, the numbers are sufficient that io two years' time the multihillico-dollar disco industry, founded oo foneliness, has spread rapidly through

the country.

Discotheques are practically conexistent in the Soviet Union, and those that do exist resemble their Western counterparts only in the ever-present dance floor and rock music.

Moscow's Blue Bird attracts the

avidly hy Indians and whites alike. Possibly this was another non-plum

they ate, nor were they always too

pioneers, those who broke the

leave by 10; they feast on such goodies as cucumbers, tomatoes, fruit juices and other ocn-alcoholic

drinks So Studio 54 was quite an eyeful for Borovic. "The place has the decor of a whorehouse, and the odor of cocaine is stronger than alcohol and expensive perfume." He ridiculed the huge crowds waiting anxiously outside, boping to be noticed in their outrageous clothes or let in to dance.

Only a "privileged few" can enter, he noted, calling them "the golden fishes" who arrive in timedglass limousines.

Borovie did praise the "first-class" audio system (it cost \$300,000] and the lighting effects in synch with the music. Such luxuries were easily afforded, Borovic said, by a management that reaps thousands each oight from \$25 entrancfees and overpriced drinks. He also alleged the owners had Mafia con-

nections.
"But the financial well-being of Studio 54 rises not only from wine fumes," he noted sarcastically. He said that "in the men's toilet oo the second floor, a man in a bright-red velvet smoking jacket poured out of a yellow box a pioch of white powder, placed it on his thumbnail and snorted it. Everything was done calmly, without any hurrying, in froot of everyooe."

'Typical Victim'

Borovie profiled the life of a typical victim of the disco trance. Hannibal Kampa, a 19-year-old cartonpacker from New Jersey, told the Russian he spends six nights a week in Manhattan discos. He practices dances after dinner, then leaves home at 10, oot to return until 4 a.m. He manages to catch three hours of sleep before going to

Plumbing the Prunus Americana and Thanksgiving far east for Priorus subcordora, the plains in the last third of the 19th

PARIS — Among the foods eat-en at the first Thanksgiving dinner were wild plums, probably in the form of prunes, but they do not appear to have been a great success, for the Memorandum of March 16, 1629 — the shopping list of the Massachusetts Bay Colony
—included a request for European

ural enough, for they were compar-ing it with a species that had 2,000 years of cultivation behind it; American plums at that time were wild. New England Indians planted plum stones and, without further attention, picked whatever fruit they produced. Even the Cherokees farther south, gifted as they were for agriculture, were content to stuff themselves with wild plums in season and to dry for future consumption what they could not eat The plums of the first Thanksgiv-

ing were probably one or both of two species: Prurus americana, then and now the most important native variety, and Promus maritima, the beach plum, still something of a New England specialty.

Many Names

Prunus americana enjoys a good many oames — August plum, goose plum, hog plum, sloe, yellow plum — so many that there is probably confusion between it and other oative species. The right one is essen-tially a yellow fruit that sometimes passes through various shades of reddish yellow to become frankly red. It grows from Maine to Flori-da, westward to Utah and northwestward into Manitoba.

The American plum has been much improved since 1621, but it has never been able to overcome the 2,000-year head start of the European plum. Perhaps nobody tried very hard; there was little incentive to work on an inferior plum when the already perfected foreign import was growing splendidly in the United States, especially just be-hind the first coastal range of the Pacific coast, where 80 percent of all America's plum trees flourish. The overwhelming majority of commercial plum production comes from this single area, espe-cially California, and the plums grown there are almost all Europe-

But the American plum has nevertheless remained one of the four commercially important U.S. species (the other three are all foreign) because certain parts of the country discourage the European plum by their dry hot summers and dry cold winters. Native plums are also more resistant to endemic diseases and insect pests than foreign spe-

hybridized with Japanese varieties. Wyo, which seems a little far north which are the hardiest of all. The for the Texas plum and a little too

hybrids can be grown successfully farther north than uncrossed American plums, and are often free-stone, have thinner skins, and produce larger plums of finer flavor,

tingent fruits.

Not only do beach plums grow on what seems most unpromising ground, they also resent any effort to coddle them. "Beach-plum jelly brings handsome prices, but it is almost always scarce because the re-calcitrant husbes have haffled all efforts to grow them commercialwrote New Eoglaoder Jonathan Norton Leonard. "Cultivation seems to offend them. When planted in rich, well-fertilized soil, they grow tall but produce hardly any fruit. Even when planted in the poor sandy soil that they seem to prefer, they sulk m captivity. Apparently they need the stress and adversity that is inseparable from life along the shore."

In the histories of the opening of the West, wild plums are often mentioned as important in the diet of the pioneers, but it is not always easy to tell which plums they were or whether they were plums at all, for the pioneers were less interested in botany than in food. Thus they gave the name of ground plum to Astralagus caryocarpus of the Missisippi valley — not a plum at all (i.e., oot a member of the genus Priorus), but that is a negligible detail considering it was edible cooked or raw.

An immigrant of the first westward wave, the one preceeding the Gold Rush, reported that "the native plum grows on a dwarf bush, perhaps 10 to 12inches high, and has the flavor of a peach." This testimony came from Fort Laramie,

Sierra plum, Pacifie plum, Oregoo plum or western plum, a large, red and pleasantly acid fruit gathered

Uniquely American is the beach plum, found oo seashores (it usually refuses to ripen in non-salt air) from Maine to Virginia, with occasional stragglers emerging as far south as the Gulf of Mexico. The beach plum season has been an event for 350 years in New England, whose citizens turn out en masse to pick the plums from their low bushes or small trees. The fruit is globular and small, ripening from a pinkish hue to purple (in

early fall in New England), and has a tough skin; but the flesh is juicy and the flavor suggests the guava. It makes excellent preserves, jam, and above all jelly - superb as an accompaniment to reasts — which seems to be almost the rule for as-

provides Spanish wine with the type of strength and character that the Cabernet Sauvignon gives to

Bordeaus. Rioja is different from Bordeaux in that wineries, known as bodegas, are not small chateaus but huge enterprises. The list includes Marques de Riscal, Pedro Domecq, Alavesa, Bilbainas, Cune, Federico Paremina. Lonez de Heredia Marques de Murrieta, Marques de Caceres, Franco-Espanolas and

Ago (Siglo). Until recently, few Riojas were imported into the United States. Today, the situation has changed. and some stores carry a wide variety of fine Rioja reds. They generally are priced under \$5, hut older bottles (10 years and up) are fre-

quently more expensive. The reds are inexpensive because they are not as dependent on vin-tage as clarets and are extremely consistent. The Rioja district is about the same size as Bordeaux and the bottles are similarly

Blind Tastings

Naturally, the taste of a Rioja is oot the same as a Bordeaux, but the quality is considered by some per-sons to be as high. In blind tastings one would be hard pressed to tell the difference between many Bordeaux petite chateaus and well-made Riojas. Older, finer Riojas might well give some of Bordeaux's Grand Cru Classe chateaus a run for their money.

There are some remarkable examples, including a complex 1954 from Marques de Murrieta. The wine had been kept in cask for most of its life and racked every year in American oak. The Spanish believe that long wood-aging provides staying power, complexity and a beautiful lingering finish. The metal wiring around the bottle according to local story was to pro-tect the wines from being copied by other winemaking regions.

The taste of the 6-year-old Vina Tondoni of Lopez de Heredia was typical of a good young Rioja. It was softer and sweeter than the '54 Murrieta, yet appeared as mature. Interestingly, there is no chaptalization (the adding of sugar) in Rioja winemaking.

It is at Marques de Caceres that one finds the best current Rioja white, a fruity 1973. It was produced without any wood-aging, and is assertive in the nose.

The winery's 1971 Rioja red is outstanding comparing well with a Bordeaux bottle. No doubt this is due to the bodega's family connection with Chateau Camensac, a fifth-growth Bordeaux. Wines here are aged in both American and Limousin oak

One's most exciting tasting can occur at Federico Paternina, a firm founded in 1896, with imposing old cellars cootaining 55,000 casks for aging wine. The bodega can pro-duce 150,000 bottles a day. The winery is now a member of the giant Spanish corporation, Ramasa, which also owns Williams & Hum-

bert, a sherry producer. Quite fascinating were its old Riojas, including a 1946 Reserva Blanco, a blend of tempranillo and malvasia grapes. It easily qualified as the best white I enjoyed in Spain. Most Rioja whites are not

exciting, but this was rich and luscious. And the old reds were outstanding: It was a thrill to taste those of 1954, 1936, 1920 and 1872.

The '54 provided elegance and fruitiness, while the 1936 and 1920 were spectacular, not unlike fine Bordeaux Grand Crus - with a slight resemblance to Chateau Latour, Both were svelte and supple, qualities not often found in Spanish wines.

The 1872 was remarkably alive, demonstrating considerable substance for its age — it drank about as well as a wine of that age could, and that goes for similar ancients

from Bordeaux. The older bottles reflect what can be found in many other Riojas. Easy on the pocketbook, they may

turn out to be one of red-wine lovers' best and most consistent alter-O Los Angeles Times

Energy Center Concentrates On Alternatives

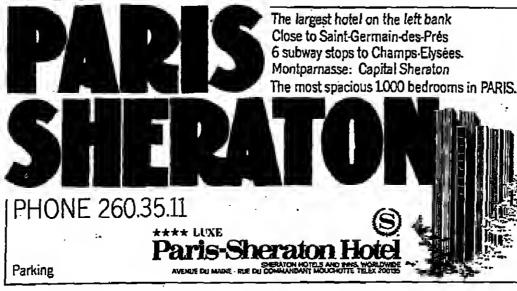

VANCOUVER, Canada, Nov. 20 (AP) - Need a windmill? Solace Energy Centers store can get you an Australian-made model for \$3.685. If you're in the market for wood-burning stoves, organic toilets or solar energy equipment, the store is the place to go.

The store, which opened in September, is operated by three friends who decided to pool their talents and interests in developing alternative energy sources.

Ed Martin, president of Solace Energy Centers Co., says there's more ideological significance to the store than simple capitalism at work. We want to make people aware how they are polluting the environment by using non-renewable resources.

Wandering through the store is like a visit to an international bazaar. Wood-burning stoves come from Norway, Taiwan, Ireland, France and the United States; the organie toilets, which turn human wastes into compost, are from Sweden; and a water turbine is made

Still, American plums are often

When Peace Is at Hand

his hig deal on Vietnam, an announcement remains in the uncomfortable position of that peace is at hand usually produces a lot of slippery fingers. So it is in the Middle East today. Frightened Israelis and fretting Egyptians are clawing over the compromises of Camp David as if the agreement posed a greater threat than the impasse of only a year ago. According to President Carter, the negotiators are now quarreling over the height of permissible observation towers and losing sight of the human dimensions of their pending accord; they are haggling over days in the schedule of troop withdrawals at the risk of losing a magic moment in time.

Deplorable as it is, the delay is a useful reminder that change in the relations between nations is not shaped by treaties or the prayers of statesmen alone. It is a rearrangement of political forces and a recalculation of military and economic bets. There are more actors in this drama than there were beds at Camp David and the extras are asserting themselves in these final stages. Prime Minister Begin seems to be unable to hold his Cabinet together for the deal he signed; some Israeli politicians seem to have thought they could take a treaty with Egypt and run from any further negotiation. And the prime minister cannot threaten resignation too often without being asked to deliver. President Sadat, meanwhile, feels compelled to match every Israeli second-thought so as to protect

As Henry Kissinger discovered in closing his own flanks in the Arab world. And Carter seeming to want peace more fervently than either of his warring partners.

> With luck, all this will pass. If Begin and Sadat survive this period of maneuver they will surely sign their treaty, for the simple reason that they have already paid most of the political price for it without yet realizing any of its benefits. Those who accuse them of selling out to the enemy will not think hetter of them for contriving a last-minute hitch. The popular majorities that have been ready to risk the peace are not likely to grow with delay. Peace remains at hand.

But the survival of two such pivotal figures cannot be taken for granted. Reigning politicians are hardly the best judges of their longevity in office. If they miscalculated the terms of peace at Camp David, Begin and Sadat will not rectify them at this late stage. And if they lack the muscle to prevail among their associates, they might as well expose the sad truth. Scratching over this agreement for several months more will not improve it in the eyes of those who are unsettled by change, even so ohvious a change for the bet-

It is time for Carter to force the issue by publishing the treaty text that he thinks best and to retire from further mediation. It is

THE NEW YORK TIMES.

Unraveling in Rhodesia

gime now says it can't do it until April. A mating its own. need for more time to prepare the new constitution is cited. The deeper reality is that the general unraveling makes it unlikely that elections - or meaningful elections - will take place at all. To foes of Prime Minister Ian Smith and the black nationalists working with him in Salisbury, this simply confirms the bankruptcy of the "internal" settlement. Smith supporters can only be dismayed that elections, critical to earning Salisbury Western support, are fading into the miasma of the war.

The guerrilla cause, meanwhile, is not exactly prospering. Punishing raids on the sanctuaries by the Smith forces, the threat states, and the distraction of Uganda's invasion of Tanzania — all this has combined to dispirit the forces of the Patriotic Front and reduce at least for a time their military effectiveness. This hardly means that the casualties of the war, and its numbling economic and social consequences, are at an end. It does seem to mean that, just as the Patriotic

Having solemnly promised to hold elec- Front has kept the internal people from contions for a black majority-rule government summating their goals, so the internal people by Dec. 31, Rhodesia's biracial transition re- have kept the Patriotic Front from consum-

> It would be consoling to say that finally the two sides are ready to compromise. In fact, they are ready for, or resigned to, continued struggle. Neither side has an evident policy, a plan aimed at taking it to its desired goal. Nor is there an evident opening for the sort of diplomacy by which the United States and Britain have been trying to transform a warring Rhodesia into a peaceable Zimbabwe. The Anglo-American plan lies, if not in ruins, in limbo.

So it happens that the liveliest question being asked about U.S. policy these days is no longer what the United States might do, increasingly posed to Zambia's political fab-ric by the guerrillas it hosts, the boost given lines. The question is whether Washington Salisbury by Zambia's opening of its border should try to make a virtue of necessity with Rhodesia for economic relief, growing some would call it failure — and declare that differences between the two guerrilla factions its inactivity is purposeful, intended to make and their sponsors among the front-line plain that the United States no longer accepts responsibility for the outcome. This is the sobering point to which events and its own acts have brought the Carter administration, which launched its southern African policy almost two years ago hopeful, if not confident, that the United States could steer

the region towards peaceable change.
THE WASHINGTON POST.

The 'Boat People'

war in Indochina continues to spin off refugees: Cambodians fleeing to Vietnam and Thailand, Laotians to Thailand, ethnic-Chinese Vietnamese to China and to the open sea. These last "boat people" have numbered in the tens of thousands since 1975, in an overall total of more than half a million. Their travails - dying at sea in sinking boats, abandonment by passing ships, denial of entry by some Asian countries - have been hearthreaking. Currently, one particular cargo of Vietnamese is lying off Malaysia.

This involves something quite new: Most boat people have fled surreptitiously in small boats, but the 2,500 passengers on the Hai Hong, a chartered ocean-going vessel, are ethnic Chinese who evidently bought their way out with the connivance of Hanoi - and to its profit. A number of vessels similar to the Hai Hong are said to be loading off Vietnam right now. As it is, the concern generated for the Hai Hong has broken a logjam in Washington.

Even before this incident, the Indochina flow was outrunning the 25,000 refugee places the United States had allotted this year -- on top of the 175,000 refugees admitted since 1975. With a smoother system, U.S. officials could have adjusted to this year's unexpected circumstances. But they didn't. They are adjusting now: Malaysia is being assured that, if it adds the Hai Hong 2,500 to the 35,000 other boat people it already has ashore, it will not have to keep them, and

The turbulence created by a generation of places are being made for additional refugees war in Indochina continues to spin off refu-Congress, in particular Rep. Joshua Eilberg, D-Pa, chairman of the key immigration subcommittee, to improve the system by granting the executive branch more refugee discretion, within agreed limits. Refugees should not be left suspended in misery at one point or another around the world while Americans fumble with the paperwork.

> The international community can do more to even out the burdens of caring for Indochina refugees. Part of that effort should he to try to stanch the flow. No doubt it is difficult for any nation to wrestle with the aftermath of prolonged war, but that is no excuse for the way the three Indochina regimes have made life literally intolerable for hundreds of thousands of their citizens. A refugee flow of this sort should be recognized and condemned internationally as a mark of gross political failure. At the same time, we see a certain risk in the Carter administration's new public criticism of the method - in effect, selling exit permits --- by which Hanoi is dumping the latest boat people. The method is cynical, and perhaps the criticism of it will help end it.

> But in Vietnam, as elsewhere, it has given hope to some desperate people. Vietnam should be faulted for destroying the lives of its people, not for one particular way in which a few of them are gaining at least the chance of a new life.

THE WASHINGTON POST.

Seventy-Five Years Ago November 21, 1903

LONDON — King Victor Emmanuel of Italy spent his day at Windsor Castle with King Edward yesterday engaged in shooting rabbits and pheasants. Shortly before eleven o'clock the Royal party, all of whom were wrapped in long fur overcoats, set out for the shooting on the royal land. The kings worked along the water's edge, shooting enough to fill three carts with the dead animals, and then met the queens for lunch at the famous fishing temple. After lunch the queens and princesses drove back to Windsor to prepare for the evening banquet.

Fifty Years Ago November 21, 1928

NEW ORLEANS - At the annual convention of the American Federation of Labor, president William Green declared: "The right to give or withhold service is the only right left to labor and we must see that it is not destroyed." Employers have succeeded in having strikes declared illegal under the anti-trust laws as being in restraint of trade. While manufacturers accuse the federation of being a menace, the Communists charge it with being too conservative. Said Green: "We want only to raise the workers' standard of living."

Israel and Egypt

By Anthony Lewis

DOSTON — The year since urging on Egypt a sense of realism
Anwar Sadat went to about what is possible in light of
Jerusalem has been a roller-coaster the sensitive state of politics in Jerusalem has been a roller-coaster of hope and disappointment. After Israel. the exhibitation of the visit came months of diplomatic stalemate. Camp David seemed to assure agreement between Israel and Egypt. Then, in the last few weeks, that expressed her fieldered that the Egyptians and Israelis would easily agree if only the United States got out of the way, Yes, and the earth is balanced that expressed her fieldered that expressed her fieldered that the expressed her fieldered that the expression of the devil theory months are the fieldered to the fieldered that the expression of the devil theory months are the fieldered to the fieldered that the exhibitation of the devil theory months of the devil theory months are the fieldered to the fieldered that the exhibitation of the devil theory months of the devil that prospect has flickered.

Frustration with the Washington treaty negotiations — the feeling that agreement is at hand but never quite achieved — has led inevitably to recriminations. Someone must be to hlame. The villain picked by

tian agreement. They have therefore pressed President Sadat to demand that the agreement be linked, in its implementation, with steps to give internal autonomy to the Palestinians of the West Bank and Gaza: the linkage that Israel resists.

Anyone who remembers the deep differences that Israel and Egypt brought to Camp David - and remembers Carter's extraordinary achievement in bridging them — will find the devil theory prepos-terous. But this is an age when publie frustration with real problems leads to a hunt for conspiracies and

witches. The idea of writing provisions for the West Bank and Gaza into an Israeli-Egyptian peace treaty was not invented by Jimmy Carter. or for that matter by Anwar Sadat.
It came from Menachem Begin.

When Begin went to Ismailia last December with his 26-point plan for peace with Egypt, one of his principal proposals was for "self-rule" in the West Bank and Gaza. That was his personal idea, one that history will surely regard as an essential contribution to the peace process. It was the germ of what became the Camp David agreement on a program of negotiation, elec-tions and autonomy in the West Bank and Gaza.

Begin made his self-rule proposal lor evident reasons. He wanted to ease the strain of running a military government in that populous occu-pied territory — the strain on its inhabitants and on Israel. And he speech, Prime Minister Begin made knew that some sign of hope for the Palestinians was politically essential to Sadat, especially for him to that this is telling the U.S. people

support of the Saudis.

Sadat, for his part, bas wanted through all the tortuous negotiations of the last year to include provisions for the West Rank will not understand why Israelis. The U.S. people would readily accept moving the U.S. capital to Chicago or California. They will not understand why Israelis. visions for the West Bank and Gaza in any agreement. He hardly needed the United States to suggest "linkage." He would have liked the West Bank-Gaza formula totally linked to the development of peace between Israel and Emery.

between Israel and Egypt. Carter and his people bave in fact spent much of their energy encouraging the Egyptians to be realistic about what they can obtain in negotiations. That was the case at Camp David. And in the last week. U.S. diplomats have again been

The International Herald Tribune welcomes letters from read-ers. Short letters have a better chance of being published. All letters are subject to condensation for space reasons. West Bank-Gaza autonomy.

oo the back of a large turtle. The truth is that there would be no glimmer of an agreement if the United States had not been so totally involved as a mediator. What makes final agreement so

hard to reach is not conspiracies or some critics in this country is the Carter administration.

According to this latest devil theory, President Carter and his advisory, President Carter and his advisors are observed with the numerical conflicts of interest ers are obsessed with the unrealistic and emotion. A year of diplomacy, aim of "comprehensive peace" in however successful, could not rethe Middle East. They are not satis-fied with a separate Israeli-Egyp-are greatest when diplomacy tries to deal with the central question of the Palestinians.

Israeli, Egyptian and U.S. leaders have all said that they want to bring King Hussein and moderate Palestinians into the negotiating process. But the attempt to do so after Camp David stirred up Israeli politics and did not get any useful response from Hussein or the Palestinians. Begin, having suggest-ed the idea of autonomy for the West Bank and Gaza, now resists any timetable for carrying it out.

In short, real problems underlie the current impasse in the Washington negotiations. Israel, understandably, does not want implementation of the peace terms with Egypt to depend on West Bank negotiarions whose prospects are uncertain Egypt, understandably, does not want to allow the possibility that Israel will never go ahead

A Nuclear Glint In Kremlin's Eye

By Stephen S. Rosenfeld

WASHINGTON — An ugly idea hovers over our deliberations on SALT: that the Russians are perfectly capable of looking nuclear war in the eye, that they are not deterred as we are by the threat of tens of millions of casualties on both sides, that they actually have in maind to fight and win a nuclear war.

ar war.

This is customarily said half in outrage (that the Russians are beasts, to take this cynical view) and half in envy (that they have the guts to face up to a prospect from which Americans shy). Intellectually, of course, the idea

that the Russians think nuclear war is winnable tends to serve SALT. The more bloody-minded the Kremlin, the more urgent it be-comes to apply whatever restraints SALT holds. But politically the idea is murder. It suggests that the Russians are Orientally oblivious of casualties, bent on violence, inberently aggressive, i.e., exactly the sort you would not want as a SALT

Hardware

To some people, the notion of the Kremlin's rendiness to fight and win a nuclear war is an unexand win a nuclear war is an unex-plored emotional premise. To oth-ers, it's deduced from hardware, like big multiple-warhead missiles, that the Russians are deploying and developing, although a fair-minded person has to grant, I think, that the Kremlin could make the same deduction from hardware we're deploying or developing. For still others, it is proved from Soviet

texts.

Typically, just this week, Defense Space Daily quoted Air Force
Gen. Alton Slay's remarks on
"three books put out by U.S. intelligence based on interpretation of writings by Soviet military

planners."
Said Slay: "The thing that came through loud and clear. . . is the fact that they had not only thought about nuclear war hut believe that they would win the war. . . They are filled with war-fighting abilities to bring on an end the war in a nnclear holocaust of any size. They look at a nuclear weapon in the same fashion that we look at an 8inch round that is non-nuclear. It is a weapon. That came through to me and it scared me. . ."

Talks a Lot

Slay's book review seems to me the Pentagon's familiar primitive budget-time line. But he is correct in asserting that the Soviet military talks a lot about fighting and winning a nuclear war. Should to shals not be taken at their war. The best answer? I have comes from scholar-diplome mond L. Garthoff, forms SALT team member and on ambassador to Bulgaria. We from 30 years of expert and wise familiarity with the Societary scene. Garthoff offer own views last summe. Harvard's International Semanazine.

magazine.

He demonstrates from he Soviet literature and from a policy in the SALT across that at least since SALT better at least since the Krendin her at least the transmitter.

the late 1960s, the Kremin he cepted that the superpower's strategic balance provides for all deterrence. That is, the Rafigure to pursue their officiently and unhelpful sums avoiding nuclear war.

Garthoff addresses directly troubles Gen. Slay and so others: "It is not accurate, is Western commentators have to counterpose Soviet milital terest in a war-fighting and terest in a 'war-fighting and winning' capability to a 'dec capability; the Soviets see the mer capabilities as providing most credible deterrent, as serving as a contingent research serving as a contingent resort should nonetheless come."

Intent Not Proved

In other words, to talk fighting and winning a ward prove intent or readiness. It is meant to morale, it arises from the ment that even the Pentago. to make plans, it reveals a fer for a rationale for building

Garthoff further shows the viet belief in mutual deter (rather than war-fighting) as the unacceptability of nuclear is maintained not only for a show and export but in de-tions of the Soviet general state does this by citing a number sues of the general staff's con-tial journal Military Though

rare and impressive source.
His conclusion is that the sians do not have a nuclear sitheir eye such as to make SAI snare and a delusion. Rather suggests, "the principal proble arms control accommodation not due to differing operative of the two sides, but to difference perceptions, to suspicions, as the difficulties of gearing differing military forces and grams into balanced and man acceptable strategic arms in tions." He's exactly right.

More Than Merely Power

By James MacGregor Burns

won office for the first time on election day are savoring the moment
when they will "assume power."
Most of them will be disappointed.

Psychological theory helped
cue power from these mechan
formulas. The power-wielder
formulas. The power-wielder
formulas one who displaced prints
one as one who displaced prints
of the power was extracted.

The power of an office, they will discover, seems larger looking in than looking out. This is due partly to our constitutional system, designed to fragment and pulverize power. It is also due to exaggerated expectations of power stemming from misconceptions about it.

Forty years ago, Bertrand Rus-sell called power the fundamental concept in social science, as energy was in physics. The notion grew that one could exercise power in the same manner as turning on a light switch or moving rooks and pawns on a chessboard. Power was seen as a thing, as an enrity that could be passed around like a crown or a bomb or a public office. Lost to view were the motives of

not know that Jews have been a mojority of the population of

Jerusalem for a century before Jordanian troops occupied the old city in 1948. They do not know that

Jews outnumbered Moslems by more than 5 10 l in Jerusalem in

Moslem was free to move there.

1905 under Turkish rule when any

Jerusalem is Jewish like Paris is

French, because it has been a living

center of Jewish culture and be-

cause the majority of its inhabit-ants have been Jewish for a very long time. Any arab claim to

Jerusalem has no more validity

than a German claim to Paris. They

took it by military force, but even when they controlled the city, very

few Arabs cared to live there. These are indisputable facts which can be

checked in any good encyclopedia. They must be known and under-stood by all active participants in

Logic in Africa

Re "Nyerere, Zimbabwe and the Alternatives," (IHT, Nov. 11-12):
Tom Wicker states that Nyerere might very well be the most force-

ful intellect among the leaders of the front-line states. He quotes him as follows: "But three alternatives

s not good English. There can only

Nyerere is wrong. To speak

about three alternatives is perfect English. Of course, one should have

six possibilities in mind. Otherwise one is using bad logic. Unfor-tunately for Africa, both Nyerere

and Wicker continue to speak about two alternatives but have

clearly only two possibilities in

and good logic is preferable to good English and bad logic. ELISABETH WIELAND.

In tangled places, bad English

be two alternatives."

HARRY J. LIPKIN.

WILLIAMSTOWN, Mass. — the power-wielders and the context dissident, do not identify with Countless Americans who in which power was exercised.

cue power from these mechanistic formulas. The power-wielder was seen as one who displaced private motives onto a public object and rationalized them in terms of the public interest. Like a good detective, one must look for motive as

well as weapon. Personal motivation and power resource were inseparable; each was diminished without the other. Immense study was now lavished on the personalities of power-holders. Eventually power theorists

came to see what novelists long had - that power-holders have far more varied motives than simply exerting control over persons and things. Some want not power but status, recognition, prestige, glory. Some use power to collect possessions such as paintings or jewelry; some collect wives or mistresses, less to dominate them than to love them or display them. I have known governors who seemed to get much more pleasure from riding in limousines driven by state troopers than in managing men or putting major bills through legisla-

There arose a "gee whiz" school that examined every trick of power and seemed titillated by it. The study of power was commercialized as we were told that for the price of a book or a small fee we could learn how to get power, how to use it, bow to influence people, how to "gain lotal control" over "everything around you," whether in boudoir, board room, or government bureau. A vast complex of human relationships was reduced to power manipulation. We came to see politics solely as power rather than the role of power poli-

Inhuman Form

In its extreme form, power can take inhuman form. Hitler, according to Richard Hughes, saw the universe as containing no persons other than himself, only "things." Ordinary Russians, says a Soviet

people. With them the govern like the sky. It is something panent, unchangeable. . ." More nign forms of power may rea human motives but only those tives that can be used by po wielders to advance their own

or interests.

Such use of power is not only human hut often fails to Social-welfare laws are passed instead of leaving people sats often arouse new demands expectations; dictators issue crees to change social and co ic behavior, only to be shot or strung up for their pains; a caust of physical power is divided at Victnamese soldiers, who keep on coming. Some vital makes is missing. It is not that power is missing. wielders ignore the atritu their targets; they spend million measure those attitudes.

Loftier Motives

What is missing is an awar that power is not merely a but a relationship; that in sechi coerce or manipulate people power-wielder is appealing to most brute or primitive or sur cial motives in people rather more positive or elevated ones. most people develop loftier mo as some of their "lower" needs are satisfied.

What is missing is the realizathat the more that power-had engage with the whole completed and the more than the property of the more they can idea and stimulate "higher needs." as those for self-expression self-replication. self-realization, and product sponses that in turn ricochet on the power-wielders and el them. What is missing, in short the role of leadership.

James MacGregor Burns is possor of political science at Will-College and author of "Leaders This is the first of two articles." ten for The New York Times.

The 90 specialists in this unique group combine professional analytical skills with a depth of knowledge of industries and countries throughout the world. They advise clients on key financial, competitive, and sociopolitical aspects of a proposed course of action. They have helped guide the acquisition and capital planning programs of both domestic and international companies. Typical assignments performed by Financial Analysis include investment valuations, industry analyses, comprehensive studies of capital adequacy, project feasibility, dividend policy.

Located in The Morgan Bank's major offices in Europe and the Far East as well as the United States, our financial analysts maintain close contacts with industry leaders, technological experts, and government agencies around the globe. When the assignment calls for it, they team with other Morgan specialists in corporate bank-

ing, mergers and acquisitions, project finance, international money management, foreign exchange.

The Financial Analysis Department conducts its studies and makes its recommendations in the strictest confidence and with complete objectivity. We believe no other financial institution offers our special combination of experience, skill, and creativity in solving difficult financial problems.

You don't have to be a banking client of Morgan Guaranty to use the Financial Analysis Department, since its services are separately compensated.

For more information about how this group might help your company, talk with a Morgan banker at any office, or write to Michael S. Reddy, Vice President, Financial Analysis Department, Morgan Guaranty Trust Company, 23 Wall Street, New York, N.Y. 10015.
